The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/574,355	Applicant(s) LEE, KI HONG	
	Examiner CHI Q. NGUYEN	Art Unit 3635	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 March 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

This Office action is in response to applicant's patent application filed on 3/30/2006.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the protrusions, grooves, ridges and valley portions must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

Art Unit: 3635

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by US Pat.

No. 6,754,992 to Byfield et al.

Claim 1:

Byfield et al. disclose a shear connector having a predetermined length in a T-shaped steel plate (col. 6, line 31), comprising: a flange 4 and a web 5 having a plurality of through holes 6-7 (Fig. 26).

Claims 2, 4:

Wherein said web 5 has a plurality of valley portions 6b and ridges 7b in wave shapes.

Claim 3:

Wherein a plurality of protrusions 11 are formed at the flange and the web.

Claim 5:

Byfield et al. disclose a shear connector having a predetermined length in a T-shaped steel plate (col. 6, line 31), comprising: a flange 23 formed of a plurality of flange pieces 23 wherein said flange pieces are cut-out in biased shapes (Fig. 14); and a web 25 having a plurality of through holes 6-7.

Claims 6, 8:

Wherein said web has a plurality of valley portions 6a and ridges 8b in wave shapes.

Claim 7:

Art Unit: 3635

Wherein a plurality of protrusions 11 are formed at the flange and the web, respectively (Fig. 18).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Pat. No. 6,754,992 to Byfield et al. in view of US Pat. No. 7,409,800 to Budge.

Byfield et al. disclose the basic structures for a shear connector as stated above but do not disclose expressly the shear connector is in a Z-shaped. Budge discloses a framing system including a connector 55 in Z-shaped configuration (Figs. 18-19). In view of Budge, it would have been obvious to a person having an ordinary skill in the art at the time the invention was made to provide Byfield different shaped of connectors, e.g. Z-shaped connector, in order to utilize in many ways of connecting frames.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
